

Thank You to the Citizens of Ironwood Township

We want to take this opportunity to thank those who supported us in our campaign to recall Ironwood Township Supervisor, Kim Mattson. While our efforts came up short by 64 votes, we believe a strong message was sent. Nearly 400 citizens showed up at the polls for the expressed purpose of removing her from office. This was not just a few people as Mattson has repeatedly claimed. However, now that the election is over, it is time to move on!

Mattson stated the township is "polarized" and we are in total agreement with her assessment. However, Mattson can use this "second chance" as an opportunity to display good judgment and integrity during the balance of her term. Elected officials are human and can make mistakes. Learning from those mistakes and accepting responsibility are qualities of a good leader.

We believe bringing the issues to light was not only positive for Ironwood Township, but to the rest of the area as well. Citizens have the right to question their government and can pull together collectively to promote change. Serving in elected office is a privilege and should be done to improve, promote, and protect the welfare of all, not just those who agree with you.

Again, thank you for your support during the past several months! We can proudly say that we did not use "misinformation" during our campaign. We stand by everything we published in the media and online, using public documents. We wanted to be successful with the truth and the facts. We did not want to succeed any other way!
